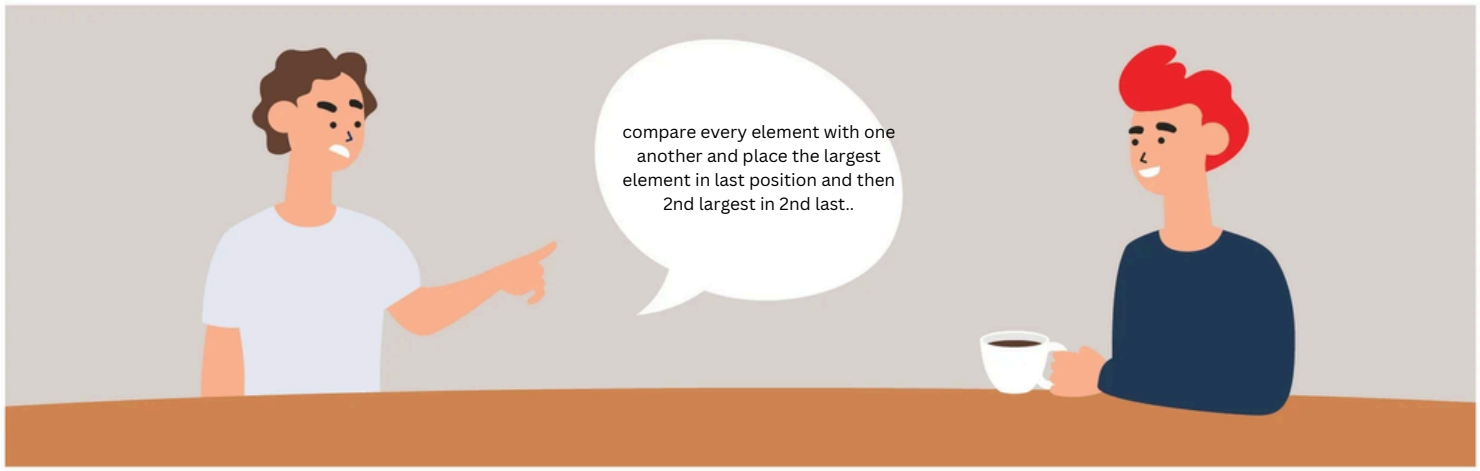
BUBBLE SORT

hey bro. do you know bubble sort

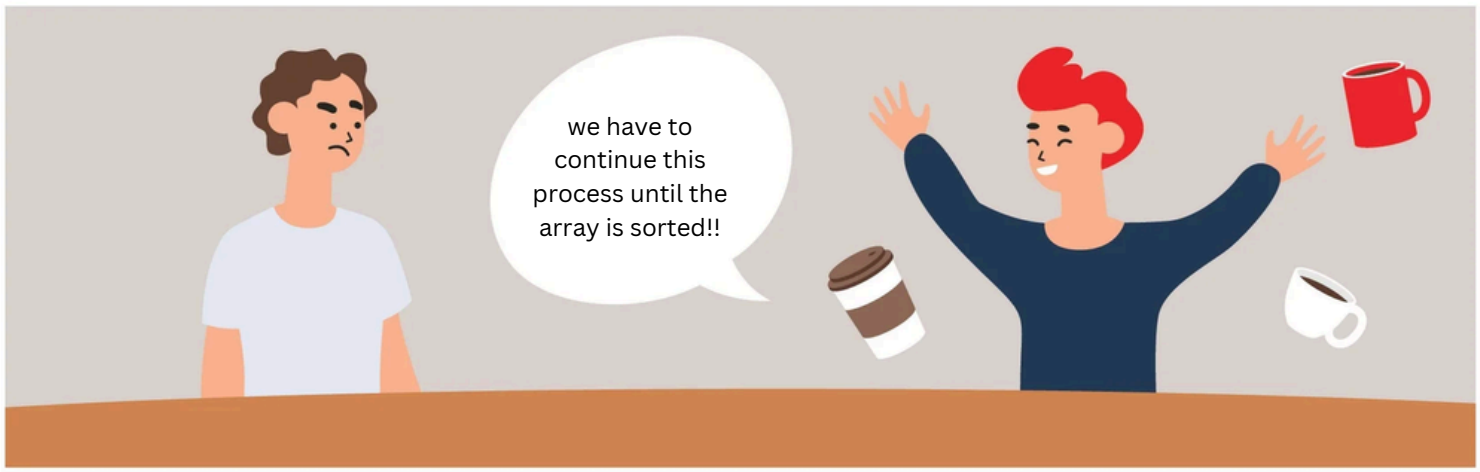
yeah bro..i know it. and i will explain it to you

thank you

firstly we have to consider an unsorted array. and then?



compare every element with one another and place the largest element in last position and then 2nd largest in 2nd last..



we have to continue this process until the array is sorted!!

Is that right?

yes. you are right

Hooray!!Now i know how to sort an array
