About this course

ABOUT IGNITE

The Ignite entrepreneurship program is a structured 14 week journey and stands out for its systematic, personalized, real-world and experiential approach to undertaking a 'Venture Journey' while learning.

It helps you, the learners, mimic the journey of a real start-up by embarking on a Problem discovery, Venture Idea development and validation, and initial prototype design journey in the context of today's industries and technologies and the opportunities within.

The focus for you is on fulfilling the 'Venture Journey' successfully; you learn ONLY for the purpose of doing that. The learning packages that you will use leverage micro-learning and interactive engagement formats like simulations and case studies never have to go through reams of paper or scores of websites to get what you want.
